

# Weekly Report

2019.01.07 — 2019.01.12

---

## Job Summary

1. Try different methods for animation video production for CCTV project. There are two approaches feasible for now. One is screen recording and filter color in video editing software. Another is using adobe animate cc to do animation. The first method will be discussed with Xuan Wang.
2. Finish projection from point on map to line and circle using mds and edge boundary.

## Work Plan

1. Implement bubble chart for visualization video project.
2. Implement video production of stream chart for visualization video project.
3. Finish course project.
